Contents

How to use this workbook

This is your flight log for Module 1. You can print it and write on it, or fill it in on screen. There are no grades and nothing to submit. Working through it is what turns a video you watched into a skill you have.

- **Part A: Warm-up reflections.** A few quick questions to get your bearings.
- **Part B: The Cleared To Try task.** The one real activity for this module.
- **Part C: Knowledge check.** Ten short questions. Answer key is at the back. No peeking until you've tried.
- **Intermediate** boxes are optional stretch tasks. Skip them your first time through if you're brand new.

The Captain's Pledge

This whole course runs on one idea: you're the Captain. The AI tools are your crew. They do the heavy lifting and teach you the controls, but they never fly the plane. You do.

Read this, then sign it. (Yes, really. Signing things makes us mean them.)

I'm the Captain of this flight

I set the destination. The crew helps me get there, it doesn't decide for me.

I'll let the crew do the heavy lifting, and keep my own judgement in the cockpit.

I'll verify anything that matters before I rely on it.

I'm allowed to go at my own pace. I'm on time, not late.

Signed: _____

Date: _____

Part A: Warm-up reflections

Write a sentence or two for each. Honest, short answers are best.

1. What do you most want AI to help with in your actual life?

e.g. writing emails, planning a trip, summarising long letters...

2. What's the worry that's been holding you back?

Name it. We'll have addressed it by the end of the course.

3. On a scale of 1–10, how confident do you feel right now?

We'll ask again at the end of Module 6. Watch the number move.

Intermediate

Write down one tool you already have an account with and one thing you tried that didn't work. We'll come back to it once you've learned to prompt properly.

Tool chooser

Tick the row that sounds most like you, then start with that tool. Remember: any of them is fine, and the skill transfers.

If this is you...	Start with
I use Gmail / an Android phone	Gemini
I use Outlook / Windows / Microsoft Office	Copilot
I mainly want help with writing and thinking	Claude
I want the most popular, most-discussed option	ChatGPT

My chosen tool: _____

Part B, Cleared To Try

→ Your task

Sign up to one tool. Say hello to it. Ask it three things about itself.

Pre-flight checklist, tick as you go

- ☐ I went to the official website or app store and checked the address carefully.
- ☐ I created an account with email, or with Google/Apple sign-in.
- ☐ I set a strong, unique password (and turned on two-factor if offered).
- ☐ I found Settings → Privacy/Data and turned OFF “use my data for training”.
- ☐ I sent my first “hello” message.
- ☐ I asked it three things about itself and read the replies.

Flight log, jot down what happened

What did you ask it, and what did it say? Anything surprise you?

How did that feel?

One word is fine. ‘Easier than expected’ is the most common answer.

Intermediate

Open a second tool and give both the identical request: “Write three subject lines for an email reminding my book club about Thursday.” Note below which you preferred and why.

Part C: Knowledge check

Ten quick questions. Circle or note your answer. Don't look at the key until you've finished. Getting one wrong is how the lesson sticks.

Q1. The best one-sentence description of an AI chat tool is:

- A) A robot that thinks for itself
- B) A well-read assistant that's very good at predicting words
- C) A search engine like Google
- D) A program that is always factually correct

Q2. Which of these does AI do WELL?

- A) Remembering your bank balance
- B) Guaranteeing facts and dates
- C) Drafting and rewording an email
- D) Counting things reliably

Q3. Which of these does AI do BADLY?

- A) Explaining a topic simply
- B) Stating hard facts and figures reliably
- C) Brainstorming a list of ideas
- D) Helping you reword a letter

Q4. The one safety rule from this module is:

- A) Never use AI for anything important
- B) Shape things with it; verify any fact before relying on it
- C) Always believe the first answer
- D) Only use it on a computer, never a phone

Q5. Which tool is the 'right' first choice?

- A) Only ChatGPT
- B) Whichever a friend uses
- C) Any major tool, the skill transfers
- D) The most expensive one

Q6. Which should you NEVER type into an AI chat?

- A) Your first name
- B) A draft email
- C) Your full bank card or Medicare number
- D) A question about cooking

Q7. A free AI tool asking for your credit card just to chat is:

- A) Completely normal
- B) A red flag; the major tools don't do this
- C) Required for safety
- D) A sign it's the best one

Q8. Turning OFF 'use my data for training' means:

- A) The tool stops working
- B) Your conversations stay private and the tool works the same

- C) You can't save chats
- D) You'll be charged a fee

Q9. If the AI gives you a wrong fact, the right response is:

- A) Trust it anyway
- B) Assume all AI is useless
- C) Verify facts and remember it can be confidently wrong
- D) Delete your account

Q10. If you feel overwhelmed partway through, you should:

- A) Give up for good
- B) Close it; it'll be there tomorrow, unchanged; you're on time, not late
- C) Buy the paid version
- D) Type faster

Answer key

Mark your answers, then read the one-line reason. That's where the learning is.

#	Answer	Why
Q1	B	It's a language predictor, not a robot, a search engine, or an oracle.
Q2	C	Drafting and rewording is its strongest everyday use.
Q3	B	It can state facts and figures confidently and be wrong.
Q4	B	Shape with it; verify its facts. The whole-course rule.
Q5	C	Any major tool is fine; the skill carries across all of them.
Q6	C	Never share passwords, full bank/card, tax, Medicare or passport numbers.
Q7	B	Free chat never needs a card up front. Treat it as a scam signal.
Q8	B	Training off = private conversations, same quality of help.
Q9	C	Confidently-wrong answers happen; verifying is the habit (Module 5).
Q10	B	Stepping away is allowed. The tool is patient and unchanged tomorrow.

Your score

8–10: You're cleared for Module 2. · 5–7: Solid, reread the recap table. · Under 5: No problem at all; rewatch Lesson 2 and try again. The number is just feedback, not a verdict.
