Contents

How to use this workbook

This is your flight log for Module 4, and it's different from the others: this one becomes your project file. The scope you lock here is what you'll point at for the life of the project, so fill it in properly, with a pen if that makes it feel more signed.

- **Part A: Choosing.** Find your track and the project that actually matters to you.
- **Part B: The scope lock.** Your outcome sentence, your steps, your first milestone.
- **Part C: The Cleared To Try log.** Two hours on your project this week, recorded.
- **Part D: Knowledge check.** Ten short questions. Answer key at the back.

The ownership rule, before you start

The crew (Claude, ChatGPT, Gemini or Copilot) is your working partner: it drafts, organises, tutors and critiques. But you're the Captain, so this project speaks in your voice and ends in your name. If anyone asks "did you make this?", the answer this workbook protects is: "I made it; I had good help."

Part A: Choosing your project

1. What have you carried around for years, half-promised to yourself?

A story to write down. A group to start. A mess to sort. A thing to learn. List everything; don't judge yet.

2. Of those, which one would you be quietly proud to show someone by Christmas?

Pride is a better picker than duty. Choose the one that tugs.

Your track

Tick the track your project belongs to. One project, one track; the others will keep for next time.

Tick	Track	What it covers
☐	A · Write	Memoir, family history, eulogy, speech, blog, letter to the editor
☐	B · Start	A small business idea, community group, newsletter, project
☐	C · Sort	Retirement plan, renovation, big trip, estate matter
☐	D · Learn	A hobby, language or skill, with AI as your tutor

3. On a scale of 1–10, how confident are you that you'll still be using AI in three months?

Answer honestly now; we'll ask again after your first two-hour session.

Intermediate

Write down the project you are deliberately NOT doing yet, and one line on why this one won first. Naming the runner-up stops it whispering to you mid-project.

Part B: The scope lock

Do this with your crew. Tell it your project, let it interview you, then fill these in. This page is the project. When new ideas arrive (they will), they go on the “next project” list at the bottom, not into the scope.

My outcome sentence

By [date], I will have [a tangible thing] that [who it's for / why it matters].

Included in this project

Explicitly NOT included (be ruthless; this is what saves you)

The first six steps, sized for two-hour sessions

- ☐ Step 1: _____
- ☐ Step 2: _____
- ☐ Step 3: _____
- ☐ Step 4: _____
- ☐ Step 5: _____
- ☐ Step 6: _____

My first milestone, due this week

My two hours are booked for (day and time, like an appointment)

The “next project” list (ideas that tried to sneak in):

Intermediate

Add a number to your milestone: pages, lessons, bookings, attendees. Then tell the crew to track it with you each session: “We’re aiming for [number] by [date]; here’s where we are. Is the pace right?”

Part C, Cleared To Try

→ Your task

Spend two hours on your track project this week.

Session checklist, tick as you go

- ☐ I showed up at the booked time (or rebooked it like a real appointment).
- ☐ I started by pasting in where the project is up to.
- ☐ We made something: a draft, a plan, a lesson, a list.
- ☐ I asked for critique, not just creation: “read this as a sceptic”.
- ☐ I decided which criticisms mattered, and ignored the rest.
- ☐ I logged the session below and noted where the next one starts.

Session log

What we made:

The best thing the critique caught:

Where the next session starts:

Ownership check: is “I made it; I had good help” still a comfortable yes?

Part D: Knowledge check

Ten quick questions. Circle or note your answer. Don't look at the key until you've finished.

Q1. How many projects should you run in Module 4?

- A) All four tracks at once, to stay motivated
- B) One project, on one track
- C) None; this module is theory
- D) As many as possible before Christmas

Q2. The best project to pick is:

- A) The most impressive-sounding one
- B) Whatever a family member suggests
- C) One you genuinely care about, small enough to finish
- D) The one that needs the least effort

Q3. A proper outcome sentence includes:

- A) A date, a tangible thing, and who it's for or why it matters
- B) A list of apps to download
- C) At least three projects
- D) A promise to work every day

Q4. The voice rule for writing projects says:

- A) Let the AI write it; it's more polished
- B) The crew is your editor and scribe, never your ghostwriter
- C) Never let AI see your writing
- D) Use the fanciest words it suggests

Q5. Project steps should be sized to fit:

- A) A spare year
- B) One heroic weekend
- C) A two-hour session
- D) The ad breaks

Q6. A feedback cycle means:

- A) Asking the crew to critique your work, not just create it
- B) Posting your project online for strangers
- C) Repeating the same prompt until praised
- D) Avoiding all criticism until the end

Q7. When new ideas try to join your project mid-flight, they go:

- A) Straight into the project; more is better
- B) On the "next project" list; the scope paragraph stands
- C) Into a different AI tool
- D) Nowhere; new ideas are banned

Q8. For estate, retirement or contract matters in Track C:

- A) The AI's plan is all you need

- B) The crew organises and prepares questions; a licensed human advises
- C) Avoid professionals; they cost money
- D) Let a family member decide

Q9. In Track D (learning), who actually learns the skill?

- A) The AI learns it for you
- B) Nobody; it's about the plan
- C) You do; the crew designs, explains, corrects and adjusts
- D) Whoever wrote the textbook

Q10. The ownership test for the whole module is:

- A) "Nobody can tell AI was involved"
- B) "I finished first"
- C) "I made it; I had good help" stays a comfortable yes
- D) "The AI is proud of me"

Answer key

Mark your answers, then read the one-line reason. That's where the learning is.

#	Answer	Why
Q1	B	One project at a time is the rule that makes the module work.
Q2	C	Caring is the fuel, and finishable is what keeps the fuel flowing.
Q3	A	Date + tangible thing + who or why. Without it, a project is a mood.
Q4	B	Protect the crooked sentences; they're what makes it yours.
Q5	C	Two-hour sessions are big enough to matter, small enough to book.
Q6	A	Finishers use the crew to critique, not just create.
Q7	B	Projects die in fog. The scope paragraph is the weather radar.
Q8	B	Crew prepares; licensed humans advise. Your billable hours thank you.
Q9	C	Your hands, ears and memory do the learning. Most active track there is.
Q10	C	If the honest answer drifts to no, pull work back from the crew.

Your score

8–10: You're cleared for Module 5. · **5–7:** Solid; reread the scope-lock page. · **Under 5:** No problem at all; rewatch Lesson 1 and your track video. The number is just feedback, not a verdict.
