How to use this workbook

This is the last workbook, and the most important page in it is the playbook: the single page that carries everything you've built into the rest of your life. Fill it in by hand if you can. Pages written by hand get kept.

- **Part A: The before-and-after.** Your confidence numbers, and what's actually changed.
- **Part B: Your one-page playbook.** The Cleared To Try, and the page you keep forever.
- **Part C: The teach-one plan.** Who you're bringing along, and how.
- **Part D: Knowledge check.** The final ten questions. Answer key at the back.

The Captain's promise, third line

You command. The crew serves and teaches. You graduate in command. This workbook is the graduation: the crew (Claude, ChatGPT, Gemini, Copilot) keeps doing the legwork, and from here on, nobody is checking your homework but you. That's not less support; that's the licence.

Part A: The before-and-after

1. Go back to your Module 1 workbook. What confidence number did you write?

2. And today, 1–10?

3. Write down three things you've actually done with AI since starting, that you couldn't have done six weeks ago.

Real ones: the letter sent, the trip planned, the project underway, the scam you'd now catch...

4. What surprised you most?

Intermediate

Write one sentence to six-weeks-ago you, the one staring at the sign-up page. You'll want it later, and it's the first line of what you'll say to the person you teach in Part C.

Part B, Cleared To Try: your one-page playbook

→ Your task

Write your own one-page AI playbook for your life.

Fill in every line below in your own words, then copy the page somewhere you'll see it: printed by the computer, in your diary, on the fridge. This page IS your graduation certificate; it just happens to be useful.

My home base tool

My three anchor tasks (task + the day it happens)

My five saved prompts (names only; the library holds the words)

My current project, and my booked session time

My safety lines

- ☐ The postcard test before I paste anything personal.
- ☐ The rule of two for any fact I'll act on.
- ☐ "I'll call you back tomorrow" for anything urgent or secret.
- ☐ Family safe word: agreed and working.

My no-go list: what I will NOT use AI for, and why

My quarterly check date (30 minutes, four times a year)

The one-page rule

If it doesn't fit on one page, it won't survive February. Cut until it's honest: only the things

you actually do, in words you actually use.

Part C: The teach-one plan

Teaching is the deepest form of learning, and captains make captains. Plan it like you've planned everything else in this course: booked, briefed, done.

Who I'm bringing along

When we're sitting down together (booked, like an appointment)

Their one real win (the put-off email? the meal plan? pick one)

My teaching checklist

- ☐ Their device, their hands on the keyboard. I point; I never type.
- ☐ Module 1 setup together: official site, safe sign-up, training off.
- ☐ One real win inside twenty minutes.
- ☐ The safe word and the postcard test before I leave.
- ☐ I leave one page behind: three messages to try, the never-share list, my number.

Intermediate

Add your quarterly review to the calendar now, all four dates for the year ahead. Three questions each time: is the routine still honest? Has anything changed that matters? What's the next project? Thirty minutes, four times a year, flying for decades.

Part D: Knowledge check

The final ten. Circle or note your answer. Don't look at the key until you've finished.

Q1. A weekly AI routine that lasts is:

- A) A detailed system across several apps
- B) One page, one habit, one home-base tool
- C) Whatever feels right each morning
- D) Something you rebuild every month

Q2. The strongest sign you truly understand AI is:

- A) Using it for absolutely everything
- B) Knowing the technical jargon
- C) Knowing when NOT to use it, and why
- D) Having the most expensive subscription

Q3. Condolences, apologies and love letters belong:

- A) With the crew; it writes beautifully
- B) With you; the point of those words is that you found them
- C) In a template
- D) Unsent

Q4. When the AI tools change (and they will), your skills:

- A) Become worthless; start the course again
- B) Transfer; briefing, steering and verifying survive every redesign
- C) Only work on the old version
- D) Must be re-certified annually

Q5. Staying current requires:

- A) Daily AI news and a few newsletters
- B) A quarterly half-hour check, verified by the rule of two
- C) Buying each new tool on launch day
- D) A computer science degree, eventually

Q6. The sensible moment to pay for an AI tool is:

- A) Before trying the free version, to get serious
- B) When an ad says the offer ends tonight
- C) After the free version earns its place and hits its limits twice in a month
- D) Whenever a lifetime deal appears

Q7. "Secret prompt" courses and unknown-brand lifetime deals are:

- A) The fast track to mastery
- B) Worth it for the bonuses
- C) Never worth it; prompting took you an afternoon in Module 2
- D) Tax deductible

Q8. When teaching a nervous beginner, the keyboard belongs to:

- A) You; it's faster

- B) Them; the moment you take it, the lesson ends
- C) Whoever types faster
- D) Nobody; teach by lecture

Q9. A new beginner's first session should deliver:

- A) A complete tour of every feature
- B) A history of artificial intelligence
- C) One real win inside twenty minutes, like their put-off email
- D) A subscription decision

Q10. The Captain's promise ends with:

- A) The AI takes over once you trust it
- B) You graduate in command; AI never flies the plane
- C) A renewal fee
- D) Module 7

Answer key

Mark your answers, then read the one-line reason. That's where the learning is.

#	Answer	Why
Q1	B	Routines that fit on a page survive February. Removed decisions become habits.
Q2	C	Choosing is mastery. The hangar rule is the graduate's tell.
Q3	B	Imperfect and yours beats polished and borrowed, every time it matters.
Q4	B	You learned literacy, not buttons. It travels across every tool.
Q5	B	Nothing that matters to your week happens at daily speed.
Q6	C	Pay on a receipt, not a gamble. Review it quarterly like any subscription.
Q7	C	Nobody has secrets worth subscribing to. One suburb over from Module 5's scams.
Q8	B	Their hands, their wins, their confidence. You point; you never type.
Q9	C	Wins recruit; explanations don't. Twenty minutes to their first "oh!"
Q10	B	Day one's promise, kept: you command, and now you know it.

Your score

8–10: Cleared to land, Captain. Welcome to the other side. · **5–7:** Solid; reread your playbook page and land anyway. · **Under 5:** Rewatch Lessons 1 and 2, then land. The number was always just feedback, never a verdict. That's the whole course in one line, actually.
